work easier

Arago Budget-It

Automating budget management between SAP Concur and SAP Funds Management (SAP FM)

arago budget-it

A dedicated application to manage budget checks and commitments

- ✓ instant budget review upon request submission
- ✓ comprehensive tracking in Concur Request for budget checks and commitments
- ✓ aligns with the standard SAP method, using SAP ICS (an add-on) for budget approval and expense recording

Arago Budget-It automates and facilitates budgeting between SAP Concur and SAP ERP

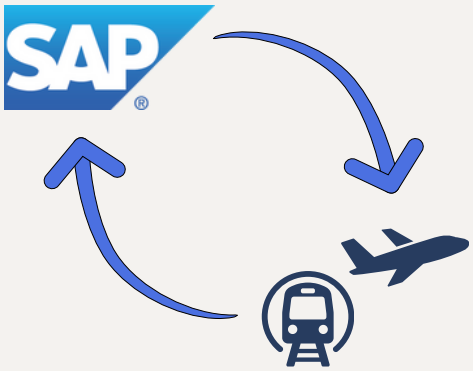
Budget-It is an application dedicated to the management of budget commitments. Budget-It facilitates budget management between Concur Request and SAP Funds Management (FM) through the automation of 3 key features:

real-time budget control

Real-time budget controlling is based on the latest SAP Concur technology (event-driven architecture). As soon as a request is submitted, Budget-It checks the available budget in SAP Funds Management (SAP FM), and the request continues the approval flow or is rejected automatically.

disengagement and liquidation of missions

After the trip, commitments are released when the request is settled in Concur Expense.



creation of commitments

Commitments are automatically created in SAP ERP based on the forecasted expenses entered in Concur Request. The commitment number is visible in the SAP Concur solution. Modifications or cancellations of a request are also managed.

SAP Gold Partner

Arago's mission is to simplify working life for everyone, whether you're new to digital technology or a tech enthusiast. We're here to ensure you always feel confident and capable, never left in the dark. As an SAP Gold partner, we help you to implement the solution that suits you for all possible HR processes plus travel and expenses management.
